

Customer Integration - Slack

Slack Users Request Authorization

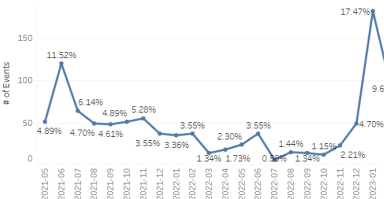

* Slack users install the slack integration for the first time

Slack Study Notification Added

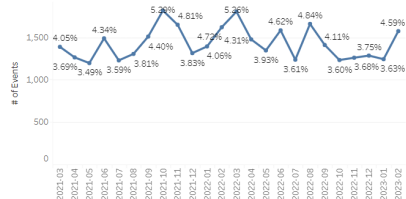

Send To Slack Button Clicked

* Share session videos, clips and HLRs from tests on UT App Website (Option 1)
* Share video link using the share modal to a slack channel

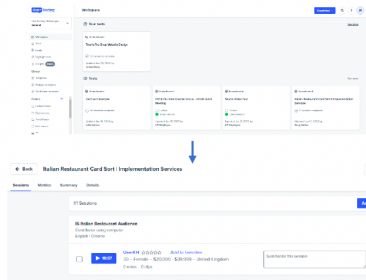

Slack Unfuril Sent

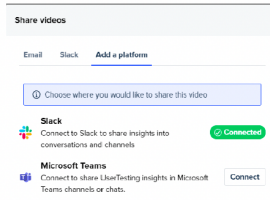

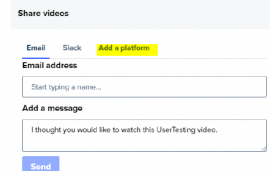

* Share session videos, clips and HLRs in the video to a slack channel (Option 2)
* Copy and paste any UT video links directly into a slack channel, which will then unfurl in the channel

1. Users Request Authorization

a. Go to UT App -> workspace -> select a test -> click "Action" -> then "Share Video"

b. Select "Add a platform" and select "Connect" Slack integration

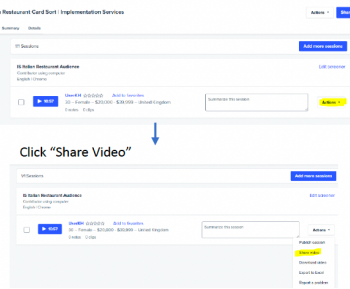

c. Now you have installed slack integration installed on UT App Website

3. Share Clips, Videos, Highlight Reels (HLRs) (2 Options)

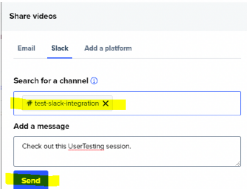

a. There are two ways to share clips, videos and HLRs

Option 1: Send to Slack Button Clicked

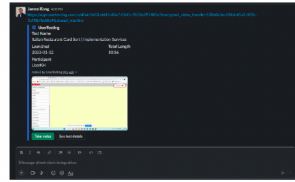

Click "Action" -> "Share Video"

Select a channel (or create a channel prior) and click "Send"

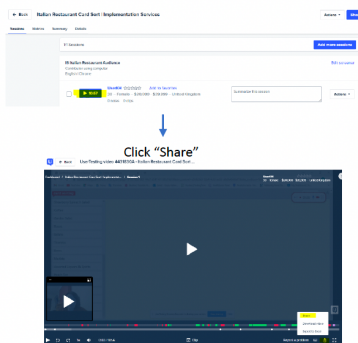

Copy and paste the link into slack

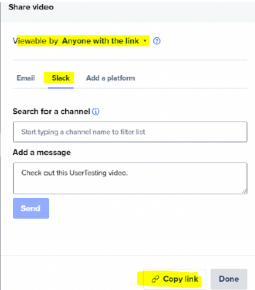

Option 2: Unfuril Sent

Click into the video

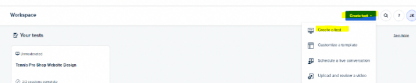

Make sure viewable by "Anyone with the link" and click "Copy Link"

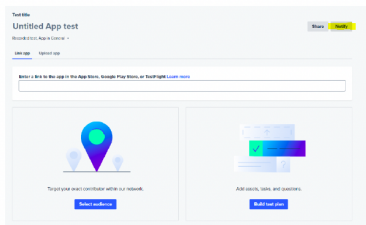

2. Study Notification Added

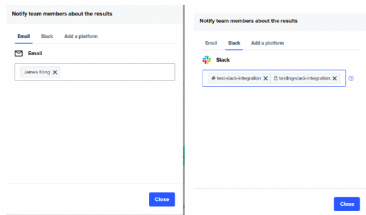

Turn on the notification just before launching a test

Click "Notify"

Enter your email and/or slack channel – set up this before the test. Following the action, the channel will receive an automatic notification when the study has launched AND when it has completed

When the test is launched and completed, the channel will receive an automatic notification
